Great Opportunities

The recent schools for firefighters have been a great success. Tied to this is the opportunity for firefighters to learn about the newest fire service organization in Minnesota for volunteer and paid on call firefighters. We are dedicated to the simple principle of recognizing the volunteer and paid on call firefighters and to help focus on individuals and their families. We are continually striving to add member benefits to our organization for the individual firefighter and their families.

MSVFA understands the sacrifice that you, a firefighter AND your family makes when a member of the family becomes a firefighter. We recognize the time away from your family to accomplish difficult and dangerous tasks to help the community you live in, be safer.

Families are in this together, while the whole family in most cases does not actively respond to emergencies they are as much a part of this activity as you the firefighter, as they give up the time the firefighter is away from the family when responding. They are the ones that pray that everything goes alright and safely so they will be reunited with the family member that provides this service to the community. The heroes of this are you the firefighters AND your families, as without them emergencies would go unanswered and the losses would be far greater.

We do not make policy for the other associations; we want you the individual volunteer, paid on call firefighter to have a voice. We want you to make choice to join your fellow firefighters and their families. Your voice will be heard.

Whenever you choose to join the Minnesota State Volunteer Firefighters Association, you will be WELCOMED!!!

Cal Larson
Chair, MSVFA
